ENVIRONMENTAL COMPLIANCE POLICY WASTE MANAGEMENT PLAN

A. STATEMENT OF PURPOSE

Illinois Marine Towing, Inc. (IMT), is committed to the environmental integrity of this Nation's natural resources. We all work together to ensure that our day-to-day vessel operations do nothing that results in a pollution incident.

B. ENVIRONMENTAL COMPLIANCE POLICY

IMT's Environmental Compliance Policy includes:

1. A comprehensive environmental sensitivity and compliance program prohibiting pollution and establishing rules and procedures for environmentally responsible operations and conduct at all levels.
2. Education for officers, managers, crew, and shore-based employees to assure that all personnel are aware of environmental laws, regulations and concerns, know how their jobs and operations may affect the environment, and know and comply with policies and procedures for environmentally correct operations.
3. Disciplinary rules for policy violations.
4. Enforcement of the Environmental Compliance Policy through inspections, record keeping and compliance reviews by management representatives and employee cooperation in reporting equipment problems, violations and accidents, which have an environmental impact.
5. Commendations and awards for employees whose suggestions, alertness, reported observations or other assistance helps correct or improve environmental performance.

C. ENVIRONMENTAL COMPLIANCE GUIDELINES

IMT's policy is to comply with all Federal, State, and Local pollution laws and regulations. The laws and regulations prohibit the placement of any pollutant including trash (includes leaving line or lock line scraps), garbage, batteries, discarded food, oil, bilge slop, waste oil, contaminated bilge water, and untreated sanitation into the waterways.

Nothing is to be discharged from or thrown overboard from an IMT vessel except gray water or properly treated sanitary water. Pumping of bilge oil, water, or other vessel waste at any time or place, except at approved locations using methods set forth below is strictly prohibited and constitutes a violation of this policy.

1. Paint products, paint thinners, solvents, and gasoline are not to be placed in the bilge or sanitation system of any vessel. Such products will be safely and securely stored in suitable containers aboard the vessel until disposed of at an approved shore-side facility.
2. All sewage must be processed and treated in the Coast Guard approved Marine Sanitation Device (sewage treatment system) aboard the vessel. In the event of a malfunction of this system, contact the office immediately. No bypass of the system is permitted at any time for any reason. Any such conduct constitutes a violation of this policy.
